25X1

	÷		
25X1		after the fog had dispersed, a Po-2 approached from the north and landed at the field.  a Po-2 25X made local flights at an eltitude of about 200 meters. The Po-2 continued the local flights after dark until 2 a.m. with position lights set. It was noticed that the runway and the field were not lighted.	1
		2. Except for some young pilots who practiced local flights and whose landings were not perfect, the crews at the field were apparently well trained. When diving the aircraft sideslipped over the left wing at an altitude of about 1,000 meters and pulled out of the dive between 200 and 150 meters. The target attacked was apparently located in the center of the airfield. It was noticed that for cross country flights, the aircraft often headed northeast and returned almost exactly after one hour from the west. Since the Po-2, which was probably used as courier plane always arrived from and left in an northeastern direction, it was assumed that there was an airfield located to the northeast, which was in some connection with Brandis airfield. The DC-3 aircraft with No. 2 which arrived with a TI-100 formation at the lands of the located to the northeast.	
	•	with No 8 which arrived with an II-10 formation on 1 April, landed four times at intervals of 90 minutes coming from the northeast, each time carrying about 15 men and material. Aircraft observed at the field on 16 April included 32 to 34 II-10s and 3 Pos-2s.	
	:	3. On 16 April, source observed that a large bunker had recently been constructed at the AA emplacement north of the eastern end of the runway. It was located on a small elevation, was about 30 meters in diameter and in the center ? meters high. Two temporary wooden buildings were erected just southwest at the bunker. Five guns were observed around the bunker. The AA unit has an estimated strength of 100 men, who were red-bordered black epaulets. <sup>2</sup>	.*
25X1	•	on 7 April, four tank cars were observed on the railroad track near the eastern end of the runway. They left the field on 2 April. A telephone cable suspended on poles was laid along the	1
25X1		southern field border from the adjustment stand to the small wooden building located in the middle of the southern field border. During air activity, a guard was observed at the wooden cabin. Except for one, the large crates, previously observed near the eastern hanger had been removed.  25X1	
	٠.		
25X1	:	Comment. A GA regiment probably equipped with about 50 Il-10s is stationed at Francis airfield.	
25X1	ä	Comment. For location of AA emplacement, see the sketch attached to a previous report.  The purpose of the 25X1 new bunker has not been determined.	
25X1 25X1 25X1		3. Comment. previously remorted these crates in connection with MiG-15s. The information cannot be verified.
